Work Experience

ISYSWAY Technologies, Thanjavur
Full Stack Development Intern

Dec 2024 — June 2025

- Worked in a team environment to build web applications using the MERN stack, with a primary focus on front-end development.
- Built responsive and interactive user interfaces using React, HTML, and CSS.
- Gained hands-on experience with version control (Git), component-based architecture, and modern JavaScript features like hooks and async/await.

White Shadow Esports Pvt Ltd., New Delhi
Web Developer Intern

Feb 2023 — Aug 2023

- Worked on website creation and management using WordPress.
- Focused on building Customized themes, configured plugins, and updated content through the WordPress dashboard.
- Created responsive and visually consistent pages using built-in tools and page builders.

Projects

ReadRipple - Book Discovery & Review Platform (MERN Stack)

[Live Preview](#) | [Github](#)

- A dynamic book review platform where users can write and read reviews, rate books, and manage personalized reading lists.
- Role-based authentication with separate admin and user roles—only admins can add or manage books in the database, while users interact with the content.

CertiKey - Password Manager (MERN Stack)

[Live Preview](#) | [Github](#)

- A secure password management app with a responsive React frontend that lets users add, view, and delete encrypted login credentials. Also includes a built-in random password generator to help users create strong, secure passwords.
- Features session-based authentication with Passport.js, cookie support, and role-based access to ensure data privacy and usability.

DailyDone - Minimalist To-Do App (React, Vite, Tailwind)

[Live Preview](#) | [Github](#)

- A clean and responsive daily task manager built with frontend tools like ReactJS, Vite, and Tailwind CSS.
- Allows users to add, complete, and clear tasks with a focus on simplicity and essential productivity features.

Certifications

Diploma in MERN Stack - MongoDB, Express.js, React.js, Node.js
